Fitting & Sanitary

No. **26**

Since 1954 in JAPAN

The chemical formula for Water is H₂O - two hydrogen atoms and one oxygen atom with no taste, no color, and no smell.

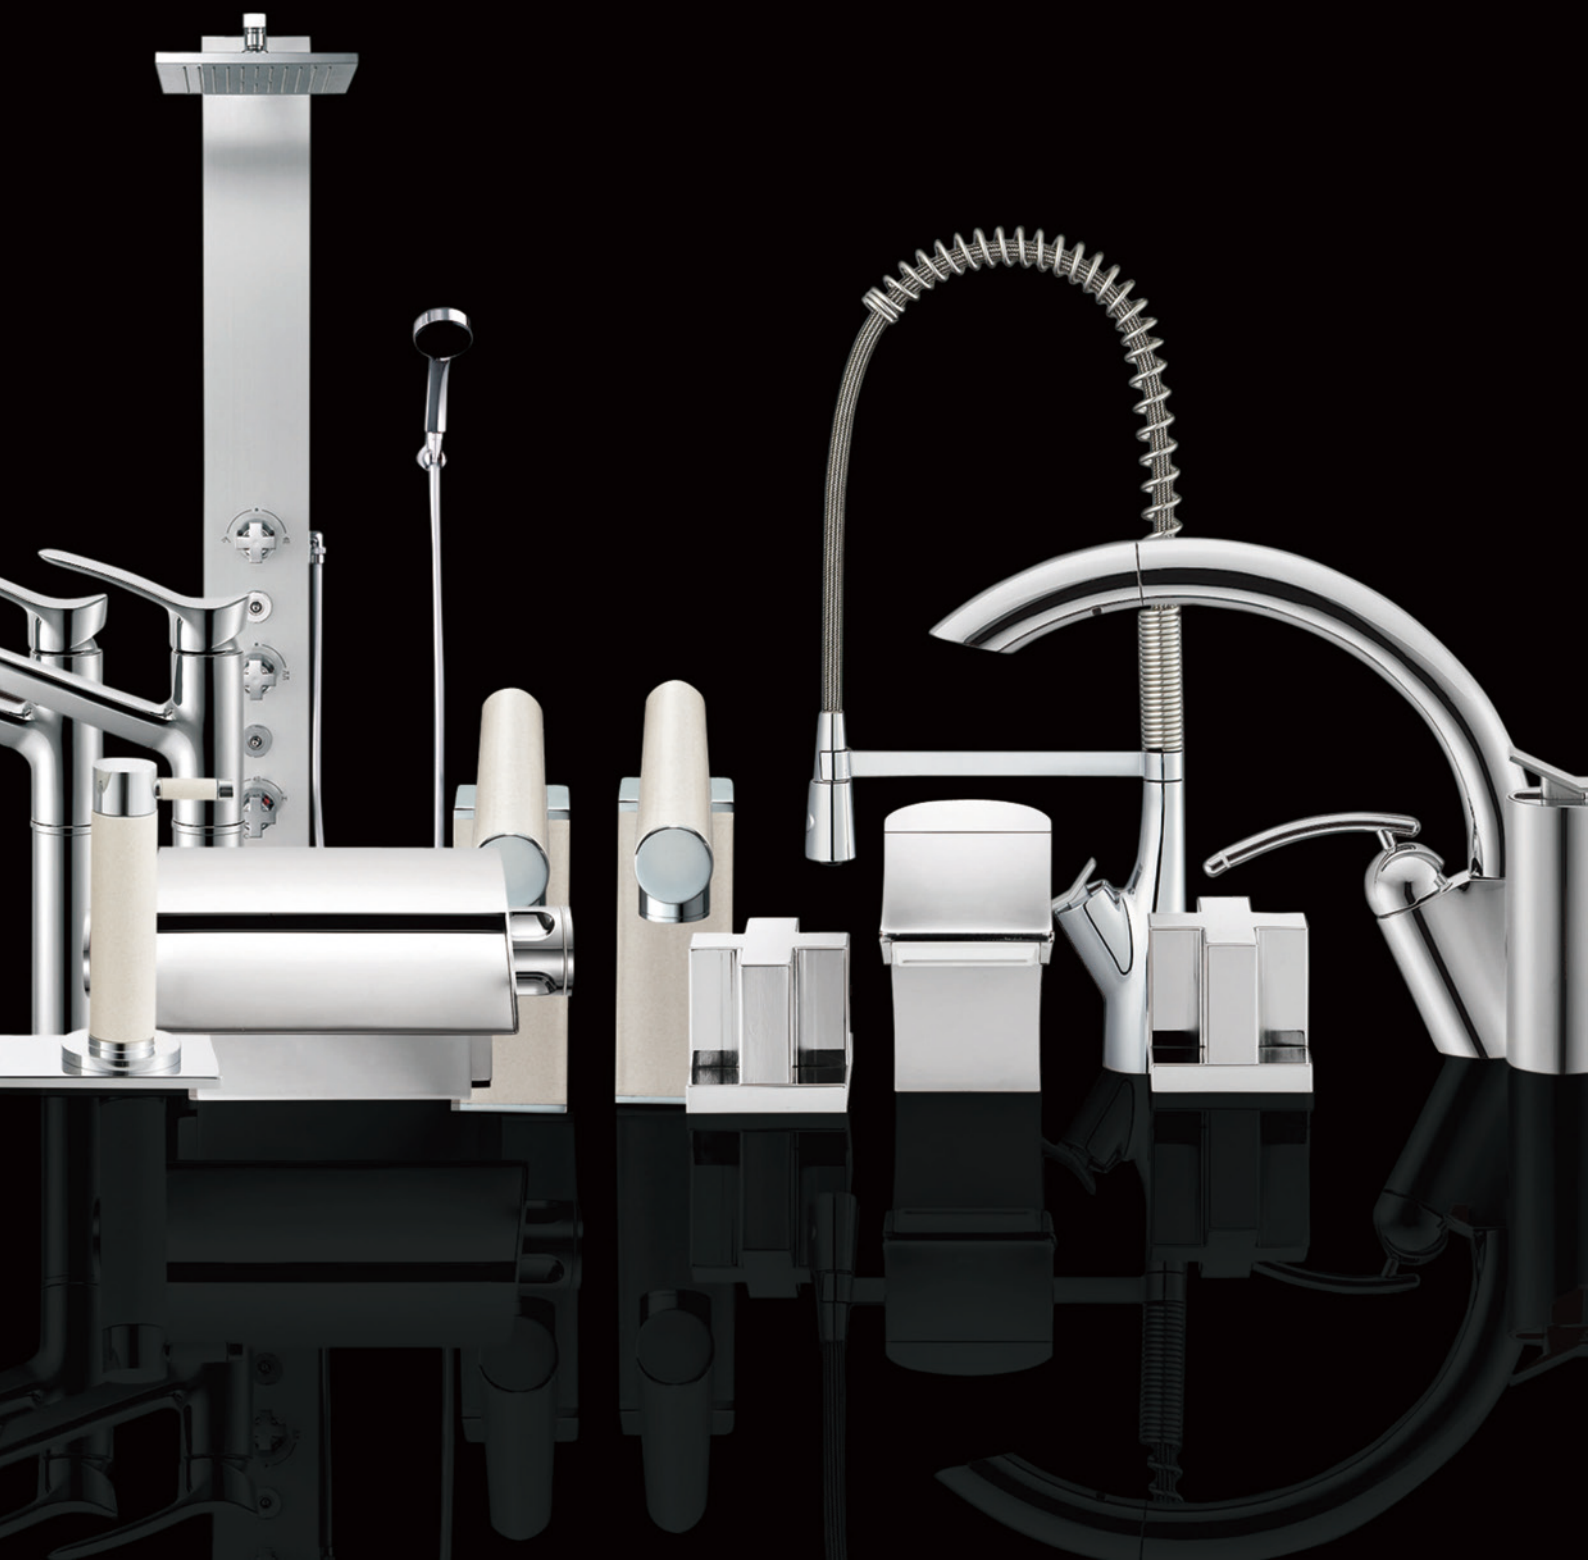

However, in daily life, we experience the comfort and beauty of water.

We sense the texture through our eyes, ears and skin.

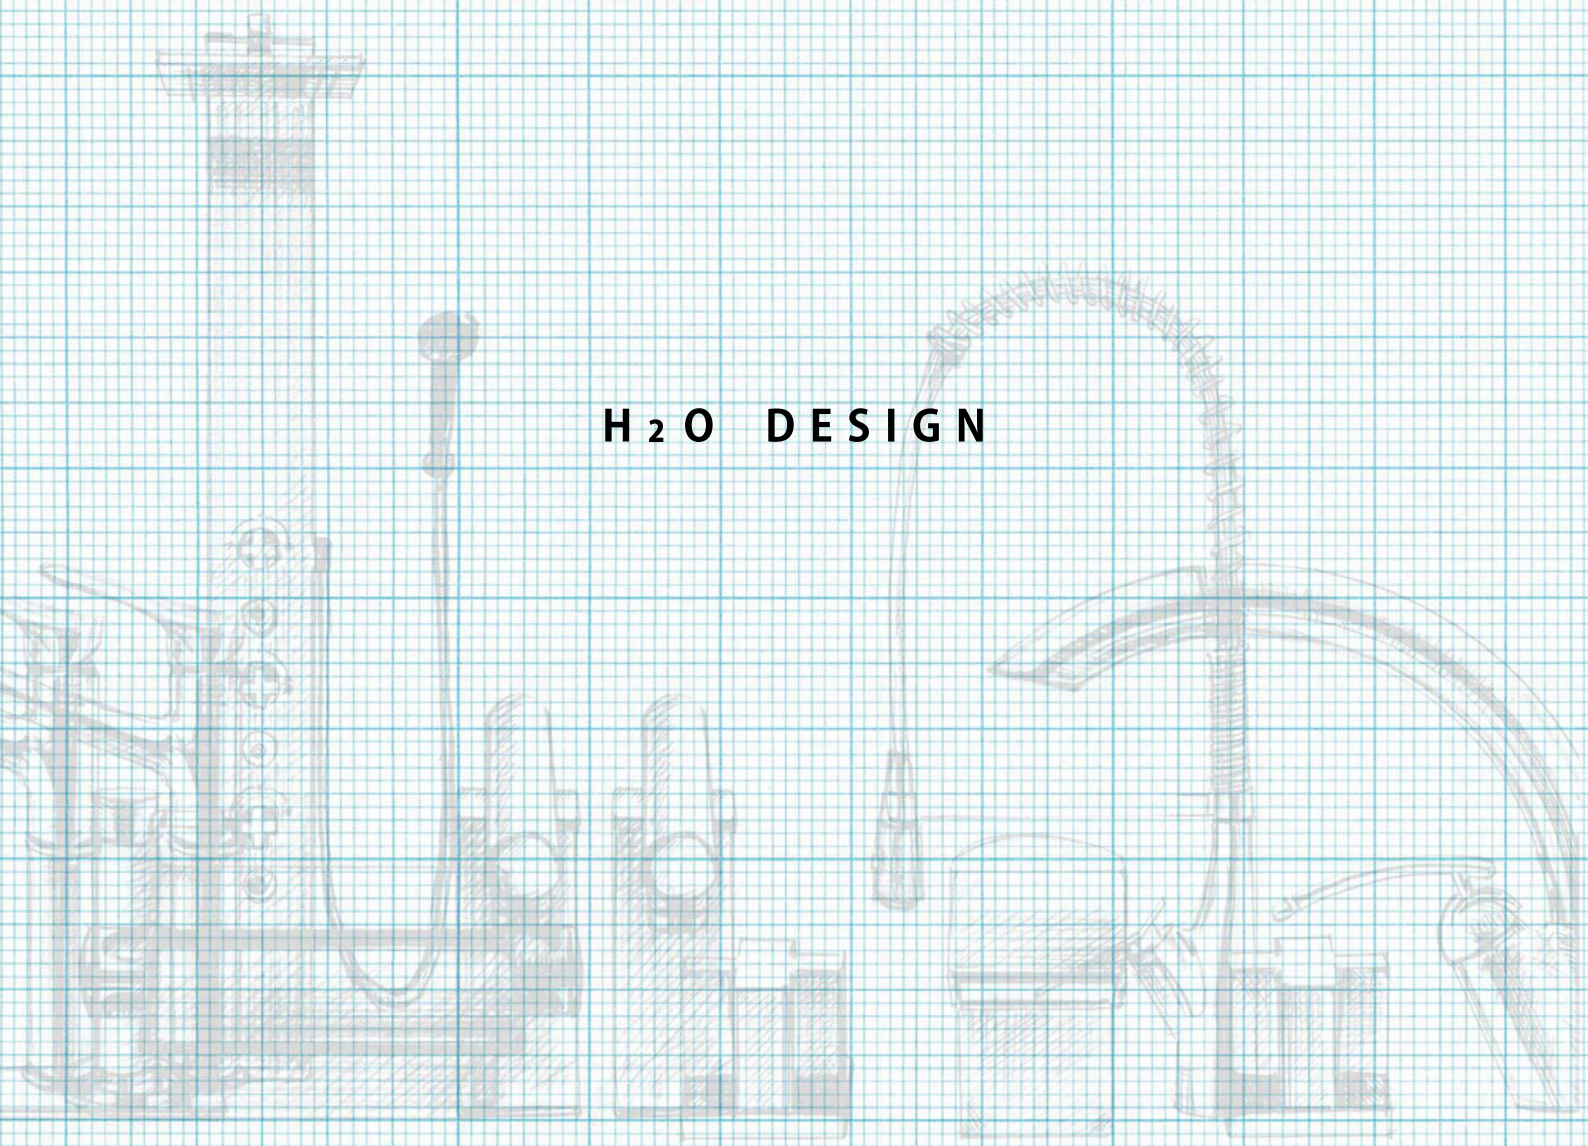

Here, we must have the power of design.

If the role of design is to create a better relationship between humans and objects, then faucets must be an embodiment of this role.

The process of creating faucets is exactly the process of designing water.

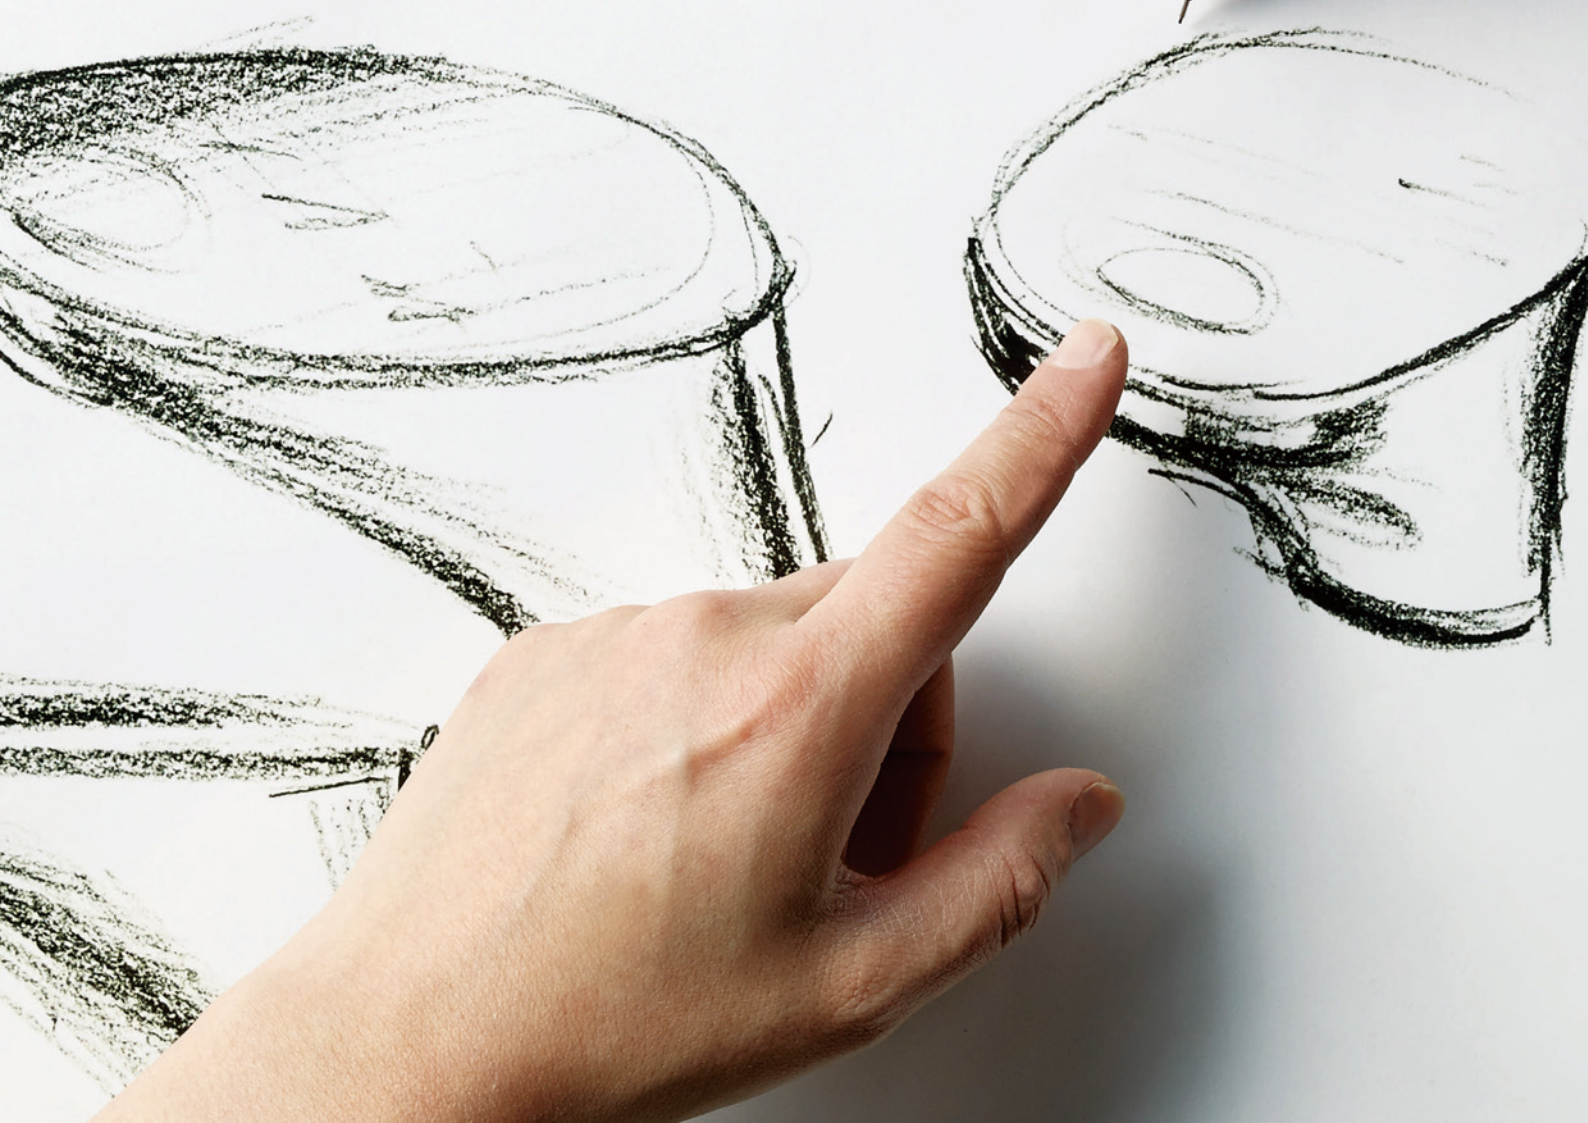

H₂O DESIGN

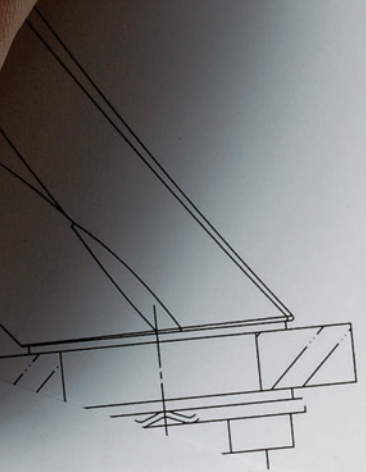

水をデザインする。

We design water.

化学式でいえばH₂O。水素が2つと酸素が1つ。
味もなければ、色も匂い也没有せん。
しかし、日常、私たちが水に感じるのは
心地よさであったり、美しさであったり・・・
目や耳や肌から伝わってくる、水の質感。
そこには、きっと「デザイン」の力があると思うのです。
「人と対象の間により良い関係をつくること」
それがデザインの役割だとするならば、
その役割を具体化したものが「水栓」
とはいえないでしょうか。
水栓をカタチにしていくプロセスこそ、
水をデザインするプロセスそのものです。

The chemical formula for Water is H₂O-two hydrogen atoms and one oxygen atom with no taste, no color, and no smell. However, in daily life, we experience the comfort and beauty of water. We sense the texture through our eyes, ears, and skin. Here, we must have the power of design. If the role of design is to create a better relationship between humans and objects, then faucets must be an embodiment of this role. The process of creating faucets is exactly the process of designing water.

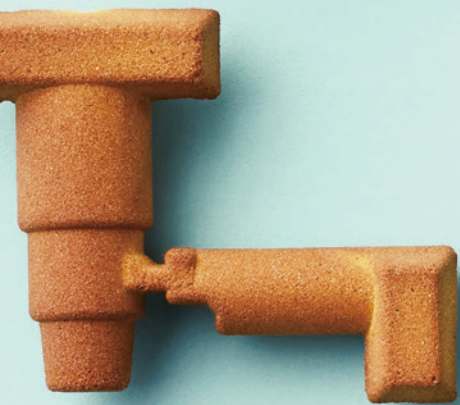

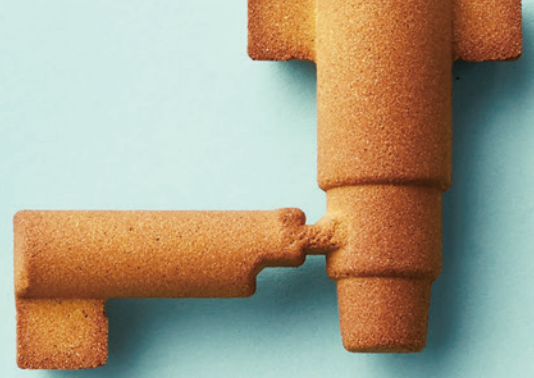

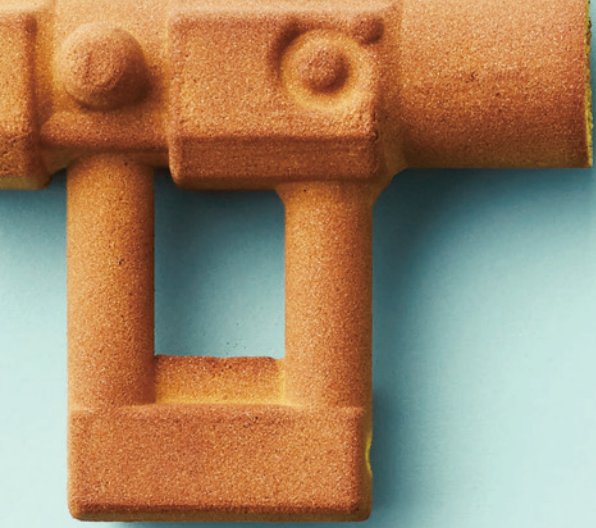

何モノにでもなれる。 何度でも。

Can be anything, again and again.

インゴット。鑄造前の金属のカタマリ。
単なる材料ではありません。
その存在自体が、巧みにデザインされた
「循環システム」の一部でもあるのです。
溶かされ、型に流され、冷えて固まって。
製品として世の中に行き渡って仕事を終えたモノたちも
すべて資源として回収され、
ふたたびこの形に還元されて利用されます。
一見、無骨のように見えて、
合理性を追求し尽くした、とことんスマートな形。
水のデザインはここから始まります。

An ingot is simple a piece of metal before casting. However, it is not just material. The metal is part of a circulation system that is cleverly designed. An ingot is melted, placed into a mold, cooled and becomes solid, and then the completed product is distributed throughout the world to fulfill its role; the product is then collected as a resource to be re-used in its original form. Although ingots are seemingly rough, their shapes are ultimately rational and smart. Our designing of water starts from these ingots.

みえないデザイン。

Invisible designs.

普段、目にする部分だけがデザインではありません。

水栓内部に空間をつくる「中子(なかご)」。

このカタチがそっくりそのまま

「水の通り道」になるわけです。

しかもこの中子、砂でできていて、

最終的には砂の状態に分解されて

取りのぞかれることとなります。

要するに、その跡にぼっかりとできる

空間こそが成果物なのです。

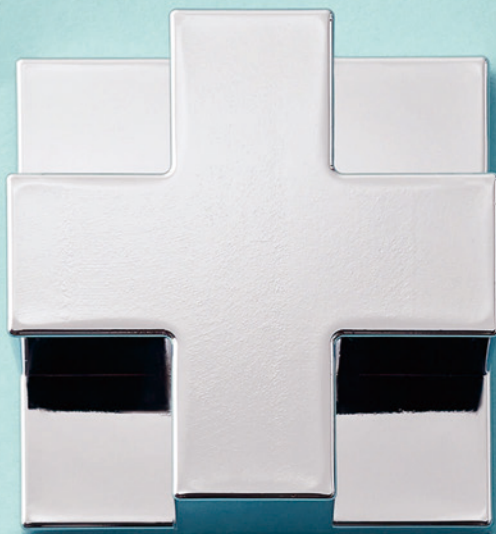

こうした計算通りの「存在と消失」によって、

水の通り道は型どられているのです。

Designs are not always readily apparent. The shapes of foundry cores, which create the space inside a faucet, become the path for water. Foundry cores are made of sand and are ultimately dissolved back into sand and removed. Shortly, the space that remains of the cores is the deliverable. The path of water is to create a better relationship between humans and objects, shaped by the calculated existence and disappearance of the sand.

言葉はいらない。

Words are not necessary.

優れたデザインというものは、
語らずして語る・・・寡黙にして雄弁です。
「このように使います」といった
説明を添える必要は一切ありません。
どんな人でも直感的に、
意識せずともストレスなく使える、
心地よいインターフェース。
おのずと示唆してくれるカタチ。
あらゆる人が毎日使う水栓こそ、
そういうデザインであるべきではないでしょうか。
人と水が出会うのに、言葉はいらないのです。

An excellent design needs no words. It is both quiet and eloquent. You do not need to explain how to use it at all. The interface allows use intuitively, unconsciously and comfortably without stress. The shape automatically guides you to the correct position and use. The design of faucets must be like that precisely because people use them every day. Words are not necessary where people and water meet.

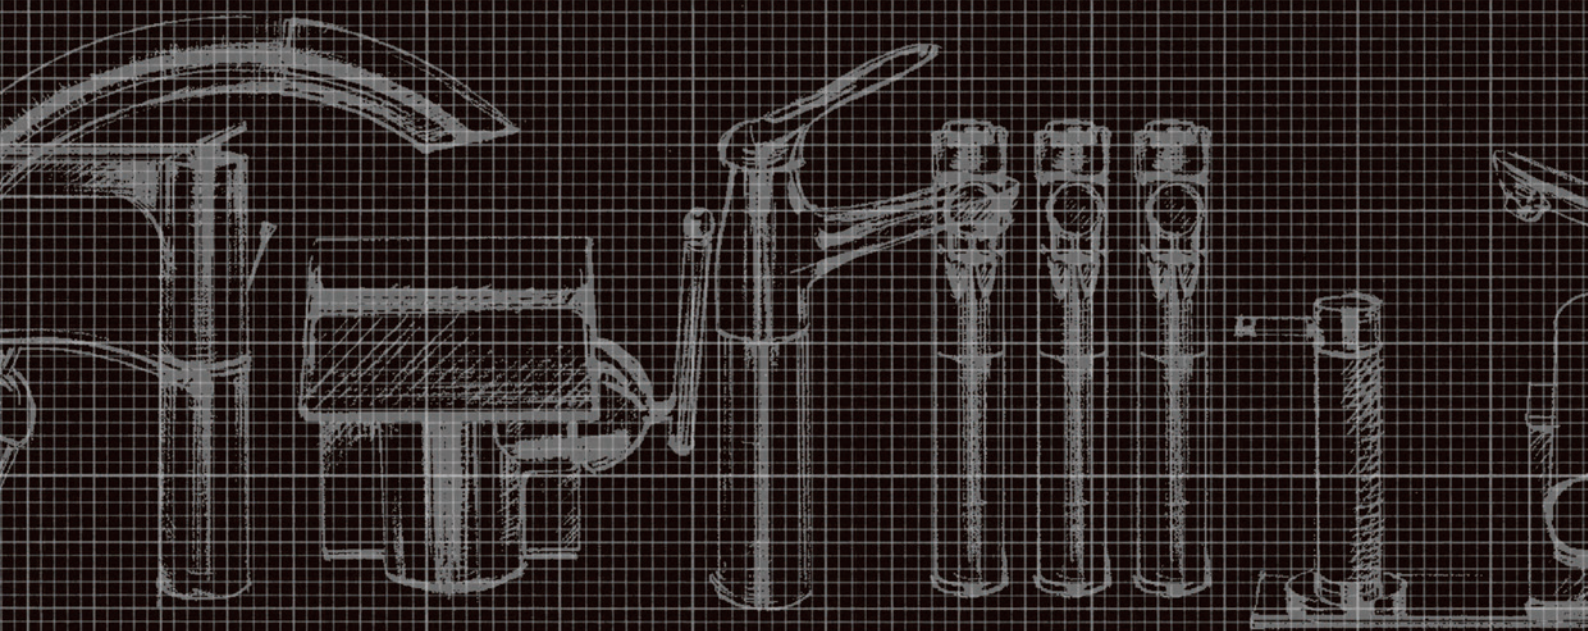

H₂O D

未知なる最適解を求めて。

進化を続ける水のデザイン。

In pursuit of the unknown best solution
our designing of water continues to advance.

Technology Ultra Fine Bubble Mist Face Wash

Membersihkan
pori-pori
dari dalam

Gelembung air
super halus

Dapat
digunakan pada
kulit kering sesuai
temperatur wajah

Technology Ultra Fine Bubble Mist Face Wash

Jika menginginkan kulit berkilau
jangan menggosok kulit saat membersihkan wajah
Karena akan meninggalkan residual pada kulit.

SARA-Ultra fine bubble mist ini dapat mengangkat kotoran,
make-up dari dalam pori-pori.
Dengan teknologi ultra fine bubble yang efektif dan aman
bagi kulit wajah.

PR23F
LEVER HANDLE
Rp. 143.000,-

- For faucet with Spindle kerep type
- Metal Handle type, Chrome finished

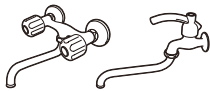

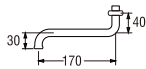

Faucet's Pipe

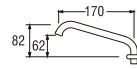

PA10J-60X
SPAREPART PIPE
Rp. 215.000,-

Useable for :

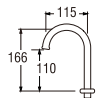

PA27J-60X
SPAREPART PIPE
Rp. 250.000,-

Useable for :

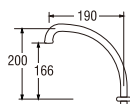

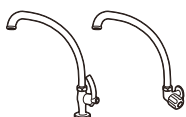

PA26J-60X
SPAREPART PIPE
Rp. 260.000,-

Useable for :

PA29J-60X
SPAREPART PIPE
Rp. 340.000,-

Useable for :

PA18A-76X
SPAREPART PIPE
Rp. 615.000,-

- Effervescent water flow with aerator.
- Stainless Steel Flexible pipe.
- Water temp. Max. 60° C.

Useable for :

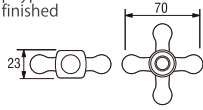

Faucet's Handle

PR250F
CROSS HANDLE
Rp. 126.000,-

- For faucet with Spindle kerep type
- Metal Handle type, Chrome finished

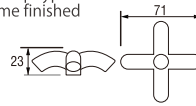

PINEAPPLE
Series

PR220F
PINEAPPLE HANDLE
Rp. 90.000,-

- For faucet with Spindle kerep type
- Metal Handle type, Chrome finished

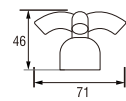

PINEAPPLE
Series

PR225F
PINEAPPLE HANDLE
Rp. 108.000,-

- For faucet with Ceramic kerep type
- Metal Handle type, Chrome finished

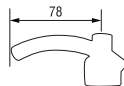

Samurai
series

PR255F
SAMURAI HANDLE
Rp. 118.000,-

- For faucet with Ceramic cartridge type or Double spindle kerep type
- Metal Handle type, Chrome finished

miniCERA
SERIES

PR235F
MINICERA HANDLE
Rp. 92.000,-

- For faucet with Ceramic cartridge type
- Metal Handle type, Chrome finished

Maintenance Parts

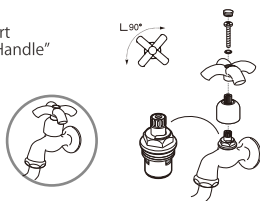

Ceramic
SPINDLE TYPE

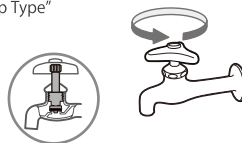

PR501
CERAMIC CARTRIDGE
Rp. 105.000,-

- Cartridge Head-Part "One-Touch Spin Handle" (90 Degrees)

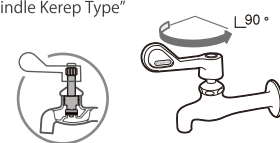

PU-36-1
SPINDLE 45mm
Rp. 84.000,-

- Useable for Faucets with "Spindle Kerep Type"

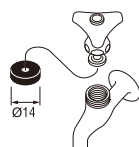

PU-38-1
DOUBLE SPINDLE 45mm
Rp. 101.000,-

- Useable for Faucets with "Double Spindle Kerep Type"

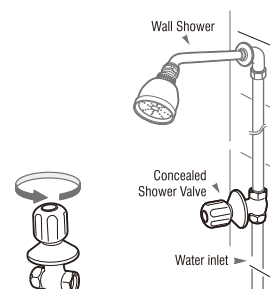

PP-12A-2S
RUBBER PACKING
for SPINDLE
Rp. 10.500,-

PU-37-1
SPINDLE 85mm
Rp. 106.000,-

- Useable for Concealed Valve with "Spindle Kerep Type"
